Biner LC is a light cure, fluoride releasing, radiopaque cavity liner and base material specially formulated for use with adhesives and composites and with conventional restorative materials.

Biner LC contains hydroxy calcium phosphate in a urethane dimethacrylate resin. It chemically bonds to adhesive primers, composites and other resin based material, and it micromechanically bonds to dentin.

INDICATION
- Protect pulp of the tooth
- Lining under all filling materials
- Protection when applying the total etch technique

CONTRAINDICATIONS
Biner LC should not be used if patients are known to be allergic to methacrylate resins

INSTRUCTIONS
① Isolate prepared teeth and air dry gently
② Place a disposable tip securely onto Biner LC syringe
③ Apply Biner LC to the dentin in increments. Remove Biner LC from enamel margin and light cure for 40 seconds, depending on the light curing unit.
④ Apply bonding system to enamel. Light cure, continue with layer of composite until cavity is filled.

SIDE EFFECTS
None known to date

CAUTIONS
Avoid contact of Biner LC with the skin/mucous membrane or eyes
None polymerized Biner LC may be caused lightly, reversible irritation or lead to a general sensitization against methacrylates.

STORAGE
- Store at room temperature
- Close caps immediately after use
- Avoid direct sun light.
